

Dear FCC:            This is reference to the NAB's petition 04-160.

I don't think it is right for these people to tell the American people what they can listen to since we are the ones paying for the services. I am a former truck driver and know how important it is to know the weather and the traffic situations for where you are headed. It makes it easier for everyone because you then have the opportunity to tell your friends who are headed the same way. Or if you have information about their area.

My husband drives truck and I am very thankful for the XM Radio. Because alot of times you can't get information on TV or local radio stations while you are driving. This is a way for them to get the information that they need to better do their jobs and be safe doing it. This is my main concern that they get to where they are going and get back home to their loved ones safe.

I respectfully urge you to reject NAB's petition 04-160 and support XM Radio's ability to provide the kind of programming that we deserve.

Very truly yours,

Jeannie Walk
